

IE2091 – Information Systems Project**Semester 2**

Sprint 1 Presentation Guide**Purpose of the Presentation**

This presentation is intended to evaluate the group's understanding of Sprint 1 implementation and how effectively the planned user stories from Sprint 0 have been transformed into working system features.

The group is expected to demonstrate:

- The successful implementation of the first working feature from each member
- Proper integration of User Interface (UI), Database (DB), and Validation
- Alignment between Sprint 1 deliverables and the Product Backlog
- Clear understanding of Agile and Scrum practices

Your presentation should consist of the following sections, and all members need to present equal amount of time. Time duration per group is 30 minutes including 2-3 minutes of Q & A. Your presentation will happen physically as per the Delivery Plan..

Presentation Guidelines**Duration**

- Total time per group: 30 minutes
- Presentation: 5 minutes
- Q&A / Lecturer feedback: 2–3 minutes
- Demo Time : 20 minutes

Recommended Slide Structure**Slide 1 – Project Overview**

- Project title
- Group ID and member names
- Assigned Scrum roles (Product Owner, Scrum Master, Team Members)

Slide 2 – Sprint 0 Recap

- Problem statement
- Identified Epics

Slide 3 – Sprint 1 Planning Summary

- Sprint Goal
- Selected high-priority user stories
- Task allocation per member
- Definition of Done applied in Sprint 1

IE2091 – Information Systems Project**Semester 2**

Slide 4 – Epic wise Progress Summary

Provide a structured summary table:

Epic planned	User stories	Completed	In progress
---------------------	---------------------	------------------	--------------------

Each group member must briefly explain:

- What was completed under their assigned Epic
- Current implementation status
- Any pending tasks (if applicable)

Slide 5 – Challenges and Improvements

- Technical challenges faced
- Requirement clarifications or adjustments
- Improvements made during Sprint 1
- Lessons learned from this sprint

System Demonstration Guidelines

During the demo session, each group member must:

1. Demonstrate their implemented feature
2. Show complete UI functionality
3. Show database integration
4. Demonstrate validation (error handling, required fields, etc.)
5. Show logical user flow from start to finish

The demonstration should follow a logical sequence aligned with user stories.

Assessment Focus

Evaluation will consider:

- Clear understanding of problem and vision
- Proper Sprint 1 planning
- Alignment between backlog and implementation
- Quality of working features
- Correct application of Agile practices
- Teamwork and coordination
- Professional presentation delivery
